Bliss is Our Self-Nature

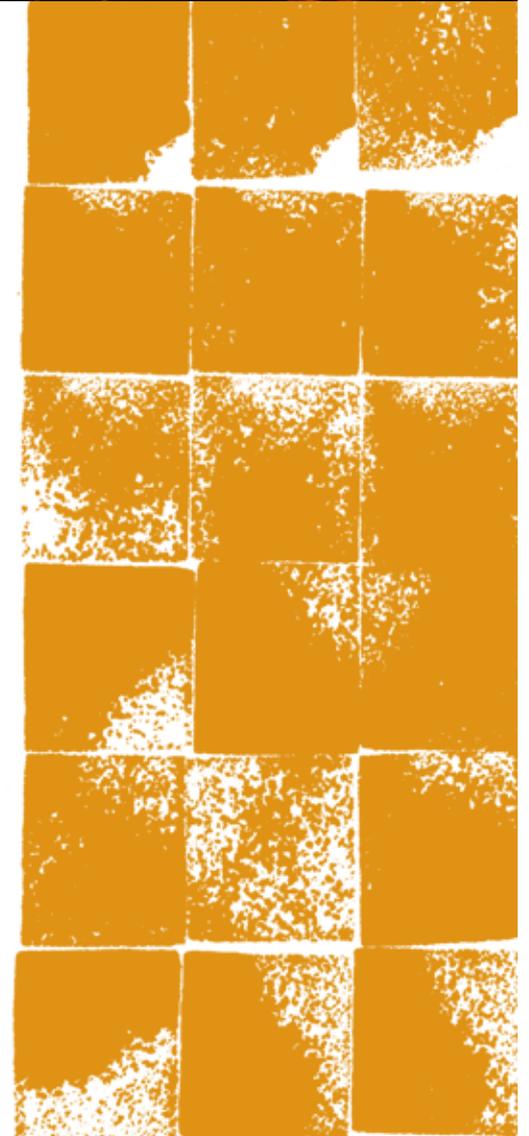

– SWAMI ANAND SVABHAVA –

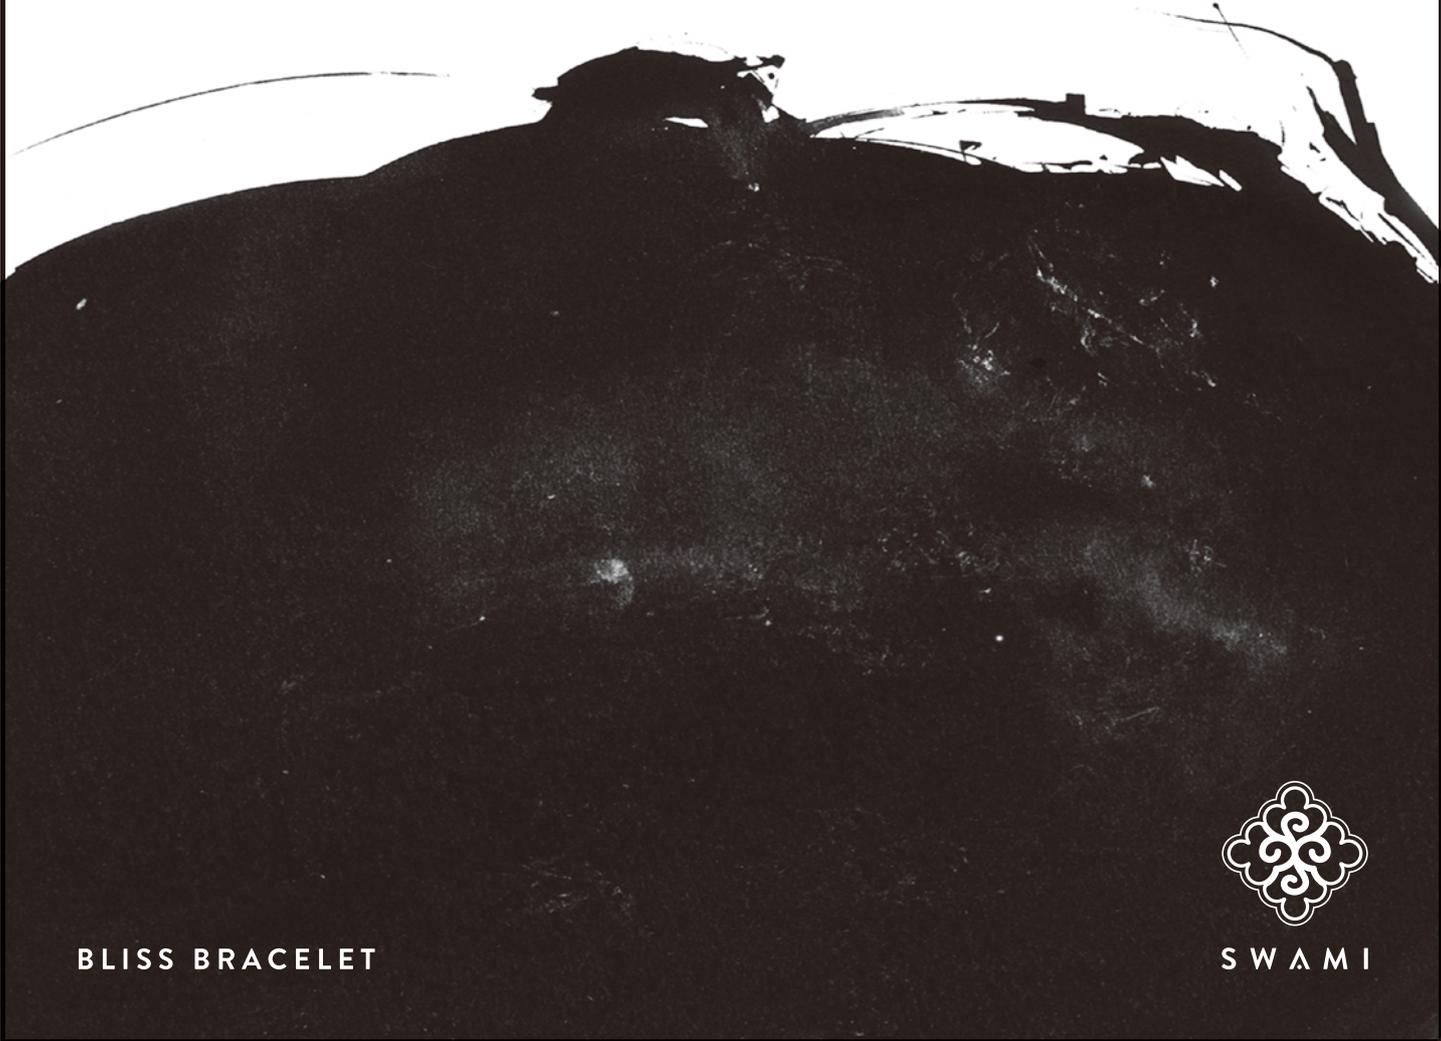

SWAMI' s power stone accessories are created from carefully selected materials born of the Earth, vibrating with the energies unique to our beautiful planet. The pieces are designed with pure intentions, handcrafted to release the message of love, peace and light into the world. Infused with prayers of Japanese esoteric Buddhism, these accessories not only look and feel beautiful, but also serve to harmonize your energy with realms of higher consciousness, increasing your ability to manifest your dreams. In Japanese, they are traditionally called "Omamori". Feel the energy and healing powers of the Universe held in the stones, imbued with prayers of love, peace, and gratitude for Mother Nature.

**Shinsho Furukawa is the Ajari,
a master esoteric Buddhist monk
that performs the Goma ritual.**

Each power stone used in SWAMI accessories receive the incantations and prayers of the Goma fire ritual, purified and impregnated with positive spiritual energy. However, these rituals can only be carried out properly and effectively by certain monks who have attained the status of 'Ajari' . This status can only be attained by completing vigorous and treacherous trainings and spiritual quests that are often described as "superhuman quests of wandering between life and death".

【Barrier Sack】

The protective sack is made from the special material used to make robes worn by Buddhist monks to protect their souls from evil spirits. The sack functions as a barrier to protect the power stones from negative energies. The orange color of the cloth represents 'the instinctual joy of ecstasy' and resonates with positive energies. Please store your power stone accessory in this bag when removing it from your body.
